Special Note: The data in Section IV was compiled from the Universal Electronic Billing Record (837). This data will not match data in other sections of the report. Data in Section V was compiled from the Kentucky hospital emergency department claims, submitted on Universal Electronic Billing Record. Emergency department utilization indicates a visit to an emergency department where the patient was treated and released or held for an observation stay, but the patient was admitted to the hospital.

# **2008 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT**

## **INTRODUCTION**

Thank you for your interest in the **2008 Annual Hospital Utilization and Services Report**. This report covers the utilization and services activities of licensed Kentucky hospitals for the calendar year, January 1, through December 31, 2008.

The report is divided into six sections:

- ◆ **Hospital Utilization & Services Decade Review**
- ◆ **Section I - Hospital Utilization Data by Licensed Bed Type**
- ◆ **Section II - Acute Bed Utilization**
- ◆ **Section III - Service Utilization**
- ◆ **Section IV - Inpatient Utilization Data from Universal Electronic Billing Record**
- ◆ **Section V - Emergency Department Utilization Data from Universal Electronic Billing Record**
- ◆ **Appendices - Definitions**

The source of data for Sections I-III is the Kentucky Health Survey Registry. Health facilities within the state submit their data through an internet based program. Section IV is generated from Kentucky Hospital Discharge data. Section V is generated from Kentucky Hospital Emergency Department Claims data. All Hospitals within Kentucky are required by statute to submit their discharge data to a vendor selected by the Commonwealth on at least a quarterly basis.

The Office of Health Policy produces a number of utilization and services reports. In addition to the Annual Hospital Utilization and Services Report, the following reports are available: Long-Term Care Report; Home Health Services Report; Hospice Report; The Kentucky Magnetic Resonance Imaging Services Report (MRI); Megavoltage Radiation Services Report; Positron Emission Tomography (PET) Report; Ambulatory Surgical Services Report. These reports can be downloaded from the following web site: <http://chfs.ky.gov/ohp/dhppd/dataresgal.htm>. Hard copies of the report can be obtained by contacting the Office of Health Policy by mail, email, phone, or fax.

Data regarding the performance of megavoltage radiation services has been removed from this report. Information regarding such services which are provided at free-standing facilities as well as hospitals is now set forth and published in the 2008 Kentucky Annual Megavoltage Radiation Services Report. Data regarding Positron Emission Tomography (PET) services are not included in this report, but can be found in the Kentucky Annual Positron Emission Tomography Services Report. Those reports can be found at [www.chfs.ky.gov/ohp/dhppd/dataresgal.htm](http://www.chfs.ky.gov/ohp/dhppd/dataresgal.htm). For purposes of compliance with the State Health Plan, the information contained in the Megavoltage Services Report and the Positron Emission Tomography Report is hereby adopted and incorporated by reference as if set forth fully herein.

Questions or comments regarding the data contained in this report should be directed to Beth Morris at (502) 564-9592, ext. 3954 or e-mail: [BethA.Morris@ky.gov](mailto:BethA.Morris@ky.gov).

This report becomes the most recent official data on hospital services utilization published by the Cabinet for Health Services. For additional copies of this report, please submit a request in writing along with a check made payable to the Kentucky State Treasurer to:

# *SECTION I*

## *UTILIZATION OF LICENSED BEDS*

## **2008 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT**

### **SECTION I**

#### **UTILIZATION BY LICENSED BED TYPE**

Combined **Acute and Psychiatric** inpatient utilization data are in **Table 1** as in previous reports. Tables 1, 2 and 4 no longer include Critical Access Hospitals (CAH) due to regulation changes in 902 KAR 20:008, (rev. 10-15-03). CAH's are reflected in **Table 1-A**. In previous years these hospitals were characterized by having no more than 15 acute beds and up to 25 swing beds. The current regulation allows for CAH's to have all 25 beds as acute or swing beds. Table 1-A combines the swing and acute care beds. The total bed compliment for CAH is not allowed to exceed 25 beds.

Since the Kentucky State Health Plan review criteria and standards consider acute non-psychiatric and psychiatric beds separately, utilization of these beds is also shown separately. **Acute Non-Psychiatric** bed data is detailed in **Table 2** and **Psychiatric** bed data in **Table 3**. Utilization of **Swing Beds** by long-term care patients is shown in **Table 4**. Utilization data for licensed long-term care beds is maintained in the Annual Long Term Care Report, which is available from this office. **Chemical Dependency** and **Physical Rehabilitation** data are in **Tables 5 and 6**.

**Table 1-B** Long Term Acute Care Hospitals (LTACH) continues to be included in this report. LTACH's are a hospital within a hospital. The beds are decertified by the host hospital, but not delicensed. These beds are certified as Long Term Acute Care Beds and are then leased to another entity. Table 1 and 2 footnote that the Licensed Acute Beds column excludes beds that are Medicare certified for provision of LTACH services. The host facility still maintains the license for those beds and that data appears in Table 1-B.

**Table 3** Psychiatric Inpatient Utilization is now broken down into six additional tables. It includes Table 3-A Psychiatric Utilization 0-17, Table 3-B Psychiatric Utilization Child 0-12, Table 3-C Psychiatric Utilization Adolescents 13-17, Table 3-D Psychiatric Utilization Adults 18 and over, Table 3-E Psychiatric Utilization Adults 18-64 Years of Age, and Table 3-F Psychiatric Utilization Adults 65 Years of Age and Over.

The following utilization indicators are used in this report: Licensed Beds, Beds in Operation, Total Admissions, Total Inpatient Days, Total Discharges, Total Discharge Days, Average Daily Census (ADC), Occupancy Percent, and Average Length of Stay (ALOS). Three of these measures - ADC, Occupancy Percent, and ALOS are the result of calculations. Note that all calculations using number of days in the year have been changed for 2008. **Given that 2008 was a leap year the calculations are based on 366 days in a year.**

The formulae for calculating indicators are:

**Average Daily Census (ADC)** = Total Inpatient Days / Days in the Reporting Period.

**Occupancy Percent** = [Total Inpatient Days / (Licensed Beds x Days in the reporting Period)]x 100. The occupancy percent is adjusted to account for bed changes during the reporting period. It also can be calculated by [Inpatient Days]/ ([Licensed Beds] \* 366). The 366 days is only for 2008 and other leap years.

**Average Length of Stay (ALOS)** = Total Discharge Days / Total Discharges.

**Acute Nonpsychiatric Care**, usually known as acute care, generally refers to those medical and/or surgical services provided for a period of time not to exceed thirty days. The higher the level of service - primary, secondary, or tertiary - the longer the patient may reside in a facility.

**Psychiatric Care** is provided in psychiatric hospitals or psychiatric units and encompasses a number of conditions. These conditions may require treatment beyond a thirty day period and, in some instances, require frequent follow-up care.

**Chemical Dependency** treatment service is a structured inpatient program providing medical, social, diagnostic, and treatment services to persons who suffer from illnesses related to the misuse or abuse of alcohol and other drugs. The setting of the service may be either in a general hospital itself or a facility devoted solely to providing chemical dependency services. Some facilities have dual diagnosis patients causing their occupancy to be higher.

**Comprehensive Physical Rehabilitation** is the process of treating an individual who, through injury or disability, acquired or congenital, is in need of assistance for attainment of the maximum level of physical, educational, and vocational function.

## *SECTION II*

*ACUTE BED UTILIZATION*

## **2008 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT**

### **SECTION II**

#### **ACUTE BED UTILIZATION**

This section shows the distribution of acute and intensive care beds by inpatient service provided. **Table 7** covers inpatient services and utilization of acute care beds. The major categories are Medical/Surgical, Obstetrics, and Other (non-classified) services. The category Other (non-classified) services has been removed. Table 7 now provides columns for ICU/CCU/Burn and Neonatal II/III.

**Table 8** covers inpatient services and utilization of intensive care beds. The major divisions are ICU, CCU, and Burn Care. Other IC/Special Care beds are no longer included in these tables, since transitional care beds (special care, progressive care, step-down beds, etc.) are not recognized as a special category of intensive care beds. These beds are considered medical/surgical beds.

**Table 9** shows the utilization of newborn bassinets and Level II and Level III neonatal care beds by facility. Inpatient days for Level II and Level III neonatal beds have been added to the table. Please look closely as columns in this table have changed.

**Special Note:** The utilization of intensive care beds and neonatal care beds is included in **Table 7**. The data shown are beds in operation and inpatient days. The ICU and CCU data in **Table 8** and the Neonatal data in **Table 9** represent a subset of the total acute care data presented in **Table 7**. Therefore, the bed and utilization data from these tables should not be added together to obtain data on the total of acute care beds.

# *SECTION III*

# *SERVICE UTILIZATION*

## **2008 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT**

### **SECTION III**

#### **SERVICE UTILIZATION**

This section covers the services that hospitals provide to their patients, from the availability of services to the use of specialized services. These tables display data on selected services such as surgical operations, heart surgery, cardiac catheterization, and CT scans.

The Megavoltage Radiation Table has been removed from the Annual Hospital Utilization Report. The data for megavoltage radiation can be found in the, “2008 Kentucky Annual Megavoltage Services Report.” The report will contain both free standing and hospital based Linear Accelerator data. The new report, once it has been published can be located at the following internet link:  
<http://chfs.ky.gov/ohp/dhppd/dataresgal.htm>.

Ambulatory Surgical Services data can be found in Table 11. A complete view of Ambulatory Surgical Services data by all facilities in the state can be found in the, “2008 Kentucky Annual Ambulatory Surgical Services Report.” To obtain a copy of the Ambulatory Report contact the Commonwealth of Kentucky, Office of Health Policy, (502) 564-9592. The data can also be found at the following website: <http://chfs.ky.gov/ohp/dhppd/dataresgal.htm>.

The Kentucky Annual Survey of Licensed Hospitals included the data collection for Positron Emission Tomography Services (PET) in the past. The PET portion has been broken out into a separate survey. A published report that includes free standing and hospital based PET scan services has been produced from the survey data. The “2008 Kentucky Annual Positron Emission Tomography Report” will be available once published on the internet at <http://chfs.ky.gov/ohp/dhppd/dataresgal.htm>.

**TABLE 30:** Emergency Department Utilization by Facility and Payor

**CHART 30.1:** Primary Payor, Kentucky Emergency Department Visits, 2008

**CHART 30.2:** Emergency Department Visits, Primary Payor vs. Kentucky Hospital ADD, 2008

**TABLE 31.1:** Selected Category Summary by Quarter, All Kentucky Hospitals

**TABLE 31.2:** Selected Category Summary by Quarter, Hospital ADDs

**TABLE 32.1:** Leading Twenty-five Primary Diagnosis, All Kentucky Hospitals

**TABLE 32.2:** Leading Twenty-five Primary Diagnosis by Hospital ADD

#### **Notes**

- 1) Data in Section V was compiled from Kentucky hospital emergency department claims as submitted on Universal Electronic Billing Record (837) prior to June 15, 2009. These data may not correspond with data in the self-reported survey sections of this report. Emergency department utilization indicates a visit to an emergency department where the patient was treated and released or held for an observation stay, but the patient was not admitted to the hospital.
- 2) Table 30 and Charts 30.1 and 30.2 summarize emergency department visits by primary payor categories Medicaid, Medicare, and Other (Commercial, Other State or Federal Programs, and Passport MMC)
- 3) Tables 31.1 and 31.2 summarize quarterly emergency department visits by residence state, gender, age, type of service, month of service, and primary payor.

ADD	Facility	Section	Memo
	Our Lady of Peace	Utilization	On March 28 of 2007 Our Lady of Peace filed a request to have 20 gero psych licensed beds relocated from JHSMH-Our Lady of Peace to JHSMH- Frazier Rehab. This resulted after facility planning process identified that the Our Lady of Peace facility was without ability to expand psychiatric operations for much needed juvenile services and that the geriatric services would benefit from relocation. The relocation of the geriatric services would allow for the service expansion at the Peace Campus while also providing more immediate medical services to the increasingly medically compromised geriatric psychiatry population served. It was believed by the medical staff that this move would improve the quality of care for the geriatric population. This CON was approved in 2007 and planned for construction began and the unit opened for business July 2008. While the 20 beds are no longer located at the Our Lady of Peace campus and are now part of the JH licensed beds, the program is still managed by psychiatry.
	University Of Louisville Hospital	Surgical	Lithotripsy service provided by Ohio Mobile Lithotripsy, LLC.
<b>7 NORTHERN KY</b>			
	St Elizabeth Medical Center South	Utilization	ICU discharges are low due to most patients being transferred out of those units to a med surg floor. Patients are then discharged from the med/surg floor.
	St Luke Hospital East	Census	LTACH beds are decertified.
	St Luke Hospital West	Utilization	The MHU at St. Luke Hospital West does not have dedicated beds for the population 65 years and older; therefore, total number of admission for the group 18 years and older includes that category.

# *APPENDIX*

**2008 ANNUAL HOSPITAL UTILIZATION AND SERVICES REPORT**  
**APPENDIX A - DEFINITIONS**

**Admissions:** Number of patients, excluding newborns, accepted for inpatient service during the reporting period. Because of internal transfers, hospital admissions may be greater than total facility admissions.

**Alcoholism/Chemical Dependency Outpatient Services:** Hospital services for the medical care and/or rehabilitative treatment of outpatients for whom the primary diagnosis is alcoholism or other chemical dependency.

**Ambulatory Surgical Services:** Scheduled surgical services provided to patients who do not remain in the hospital overnight. The surgery may be performed in operating suites also used for inpatient surgery, specially designated surgical suites for ambulatory surgery, or procedure rooms within an ambulatory care facility.

**Average Daily Census (ADC):** Average number of inpatients, excluding newborns, receiving care each day during the reporting period. Derived by dividing the number of inpatient days by the number of days in the reporting period.

**Average Length of Stay (ALOS):** Average stay of inpatients during the reporting period. Derived by dividing the number of discharge days by the number of discharges.

**Bassinets:** Number of newborn infant bassinets set up and staffed for use at the end of the reporting period. Bassinets are not included in the bed total and do not include isolets or neonatal intensive care units, which are included under beds.

**Beds:** Number of beds, cribs, and pediatric and neonatal bassinets regularly maintained (set up and staffed for use) for inpatients during the reporting period; does not include bassinets for normal newborn infants.

**Births:** Total number of infants born in the hospital and accepted for service in a newborn infant bassinet during the reporting period; excludes stillbirths. Births do not include infants transferred from other institutions and are excluded from the admission and discharge figures.

**Burn Care Unit:** Provides care to severely burned patients that is of a more intensive nature than the usual acute nursing care provided in the medical and surgical units. Beds must be set up and staffed in a unit specifically designated for this purpose.

**Cardiac Catheterization Laboratory:** Facility for special diagnostic and therapeutic procedures necessary for the care of patients

with cardiac conditions. Available procedures must include, but need not be limited to, introduction of a catheter into the interior of the heart by way of a vein or artery or by direct needle puncture.

**Census:** The actual number of inpatients receiving care on any given day during the reporting period; does not include newborns.

**CT Scanner:** Computed tomographic scanner for head and/or whole body scans.

**Discharge Days:** Sum of the Length of Stay (LOS) of those discharged during reporting period.

**Emergency Department:** Organized hospital facility for the provision of unscheduled outpatient services to patients whose conditions require immediate care. Must be staffed 24 hours a day.

**Inpatient Days:** Number of adult and pediatric days of care, excluding newborn days of care, rendered during the entire reporting period.

**Intensive Care Unit (cardiac care only):** Provides patient care of a more specialized nature than the usual medical and surgical care, on the basis of physicians' orders and approved nursing care plans. The unit is staffed with specially trained nursing personnel and contains monitoring and specialized support or treatment equipment for patients who, because of heart seizures, open-heart surgery, or other life threatening conditions, require intensified, comprehensive observation and care. May include myocardial infarction, pulmonary care, and heart transplant units. Beds must be set up and staffed in a unit or units specifically designated for this purpose.

**Intensive Care Unit (mixed or other):** Provides nursing care to adult and/or pediatric patients of a more intensive nature than the usual medical, surgical, pediatric, and/or psychiatric care on the basis of physicians' orders and approved nursing care plans. Included are medical-surgical acute, pediatric, and psychiatric (isolation) units. These units are staffed with specially trained nursing personnel and contain monitoring and specialized support equipment for patients who, because of shock, trauma, or life-threatening conditions, require intensified, comprehensive observation and care. These units may also include cardiac care when such services are not provided in a distinct cardiac care unit.

**Long Term Acute Care Hospital Beds (LTACH):** An LTACH is a hospital within a hospital. These beds are decertified licensed beds in host facility that are then certified as LTACH beds to another facility. They contain long term acute care patients.

**Megavoltage Radiation Therapy:** The use of specialized equipment in the supervoltage and megavoltage (above one million volts) ranges for deep therapy treatment of cancer. This would include cobalt units, linear accelerators with or without electron beam

therapy capability, betatrons, and Van de Graff machines.

**Neonatal Intensive Care Unit:** Provides care to newborn infants of a more intensive nature than the usual nursing care provided in newborn acute care units, on the basis of physicians' orders and approved nursing care plans. Beds must be set up and staffed in a unit specifically designated for this purpose.

**Obstetrics Unit:** Provides care to mothers following delivery, on the basis of physicians' orders and approved nursing care plans. Beds must be set up and staffed in a unit specifically designated for this purpose.

**Occupancy:** Ratio of total inpatient days to total bed days in the reporting period. Bed days are the number of licensed beds times the number of days in the period, adjusted for changes in the number of beds during the period.

**Open-Heart Surgery Facility:** The equipment and staff necessary to perform open-heart surgery.

**Organ Transplant:** The necessary staff and equipment to perform the surgical removal of a viable human organ, other than the kidney, from either of living donor or a deceased person immediately after death, and the surgical grafting of the organ to the suitably evaluated and prepared patient.

**Organized Outpatient Department:** Organized hospital services (or clinics) for the provision of nonemergency medical and/or dental services for ambulatory patients.

**Outpatient Visits:** Visits by patients who are not lodged in the hospital while receiving medical, dental, or other services. A visit consists of one or more occasions of service. Each test, examination, treatment, or procedure rendered to an outpatient counts as one occasion of service.

**Pediatric Inpatient Unit:** Provides acute care to pediatric patients on the basis of physicians' orders and approved nursing care plans. Beds must be set up and staffed in a unit specifically designated for this purpose.

**Physical Therapy Services:** Services and use of facilities prescribed by physicians and administered by or under the direction of a qualified physical therapist.

**Psychiatric Inpatient Unit:** Provides acute care to emotionally disturbed patients, including patients admitted for diagnosis and those admitted for treatment of psychiatric problems, on the basis of physicians' orders and approved nursing care plans. May also

include the provision of medical care, nursing services, and supervision to the chronically mentally ill, mentally disordered, or other mentally incompetent persons. Beds must be set up and staffed in a unit(s) specifically designated for this service.

**Rehabilitation Inpatient Unit:** Provides coordinated multidisciplinary physical restorative services to ambulatory patients under the direction of a physician knowledgeable and experienced in rehabilitative medicine.

**Surgical Operations:** Those surgical operations, whether major or minor, performed in the operating room(s). A surgical operation can involve one or more surgical procedures, but is considered only one surgical operation.

**Swing Beds:** Licensed acute care beds designated to be used alternately for acute or skilled nursing care.
